Regional Overview and Deliverables

With a successful start to year three of the Backyard Tree Planting Program (BYTP) in Durham Region, we are pleased to provide you our interim report. In July of this year, Brock and Clarington joined the LEAF/Durham Region Agreement. With these additional municipalities, our tree planting goal for year three increased to **244 trees across Durham Region**.

At the beginning of year two (July 2021), we encountered unexpected staffing shortages resulting in reduced capacity to conduct consultations with residents while we worked to recruit and train new team members. We are pleased to report that the Backyard Tree Planting Program has come back stronger than ever in year three, with a staff team ready to provide top notch services to the residents of Durham Region. Since July 2022, there has been a steady stream of interest from Durham Region residents, which has led to a total of 137 trees and 106 shrubs planted in the first part of year three, with 117 property owners participating in our programs. The remaining 17 trees and 7 shrubs sold are ready to be planted in our spring 2023 season.

Along with our new staff team came improvements in technology in 2022 as we successfully implemented paperless operations. Adaptations and technological tweaks to our processes have led to increased flexibility, efficiency, productivity and sustainability, allowing us to better connect with our clients to provide them the best possible service.

Please note that the information below includes all applicants and participants to date, as well as all trees and shrubs sold to date with some scheduled for planting in spring 2023.

Deliverable	Status (as of December 15, 2022)
Plant at least 244 trees (3 shrubs = 1 tree) 40 trees in each in Ajax, Clarington, Pickering, Oshawa and Whitby 22 trees in each in Brock and Scugog	154 trees sold 137 planted in fall 17 sold for spring 113 shrubs sold (37 tree equivalent) 106 planted in fall 7 sold for spring Total - 191 trees sold
Reach at least 530 residents through outreach/educational activities	242 residents reached in total 100 residents (households) reached through Full Service BYTP 17 residents (households) reached through DIY BYTP 6 residents attended Volunteer Orientations 7 residents reached through the Social Media Outreach Team 110 participants attended Community Planting Events 2 attendees attended virtual Tree Tours 0 attendees attended virtual presentations
Provide recognition for the Municipal Partners' support on LEAF's website, print materials and through social media	18 LEAF News items related to Durham Region programs 6 blogs recognizing Durham Region's support 14 mentions/tags of Durham-based content on social media 11 earned media items Durham Region logo on LEAF website
Provide promotional content for the Municipal Partners' use, including website content, brochures, posters, advertisements and social media content	Worked with the Region and municipalities to develop communications plans that identify communications channels and promotions strategies. Created promotional items that recognize partner support, including website content, brochures, posters and ads: 3 region-wide promotional items 1 municipal promotional items

Promotions

Regional and Municipal Communications

We worked with the Region and municipalities to develop communication plans again in 2022 that highlight communication channels and promotional strategies aimed to increase program participation. These plans highlight:

1. Creating LEAF content to display on municipal websites
2. Creating Region-wide promotional material, including a brochure, poster, shareable digital images, newsletter content and social media posts
3. Identifying unique Regional and municipal communication channels and creating the necessary content

Summary of Promotional Items

LEAF Social Media Content for Municipal Channels

LEAF developed a social media content for municipal partners for the summer and fall of 2022. This content was shared, in some capacity, by all municipalities and the Region. Content focused on promoting BYTP, with a focus on consultations, the fall planting season and shrub bundle promotion.

LEAF also created and tagged partners two paid social media ad campaigns that earned high reach:

Plant native trees for less! - August 18, 2022

- Reach: **19,475**
- Comments: **2**
- Links Clicked: **165**
- Likes: **36**
- Shares: **12**

#DYK that fall is a great time to plant a tree? - September 5, 2022

- Reach: **19,352**
- Comments: **2**
- Links Clicked: **512**
- Likes: **28**
- Shares: **8**

Recognition of Regional/Municipal Support

LEAF Website

We recognize partner support by displaying logos on the following pages of our website

- [Supporting Partners](#)
- Plant pages with our general BYTP banner:

LEAF News

Our electronic newsletter currently reaches over 8,770 individuals. Since July of 2022, we included 18 items which linked back to the BYTP-related web pages and/or a Durham-related blog.

LEAF Blogs and Social Media

Since July of 2022, we have published 6 blogs which link back to BYTP-related pages of our website. The blogs are included in LEAF News (see above) and promoted through our social media channels (Twitter 12,590 followers; Facebook 6,280 followers; and Instagram 3,250 followers). In addition to blogs, we posted regularly on social media, always linking back to the BYTP-related pages of our website and often tagging partners.

Media Coverage

A media release announced Brock and Clarington's inclusion at the start of Year 3 of the program:

19-Jul-22 – [Durham Region battles climate change by welcoming Brock and Clarington into tree planting program](#)

A second media release highlighted naturalization efforts sponsored by OPG in Durham Region:

29-Nov-22 - [Naturalizing York and Durham Regions with Native Trees and Shrubs](#)

The following table captures media coverage of LEAF content that recognizes Durham Region's support, including the year 3 media release, event related media advisories and blogs that highlight the Region's support. We track coverage by media outlets as well as mentions on websites and in community newsletters.

Additional Education and Engagement Activities

Community Tree Planting Activities

In the fall of 2022, LEAF facilitated a combination of three private and public planting events open to LEAF volunteers and community members in accordance with provincial and municipal guidelines in Durham Region: one public event in Whitby, and one public and one private event in Oshawa. Through these planting events, LEAF planted **949 native trees and shrubs** and engaged **164 participants and 26 LEAF volunteers** who contributed **484 volunteer hours**. Out of this total, 110 community planting participants were Durham Region residents.

© 2022 Sarah Halonen/LEAF - LEAF volunteers planting native trees and shrubs Russett at our October community planting event in Oshawa.

Social Media Outreach Team

In 2022, we ended formal administration of the Social Media Outreach Team (SMOT) as COVID-19 restrictions were lifted. One volunteer took on the SMOT role independently sharing eleven Durham Region specific social media posts. We plan to reinstate our in-person Outreach Team in 2023 and begin attending outreach events again in the new year. Therefore, we will no longer be tracking the efforts of the SMOT unless our volunteer plans to continue.

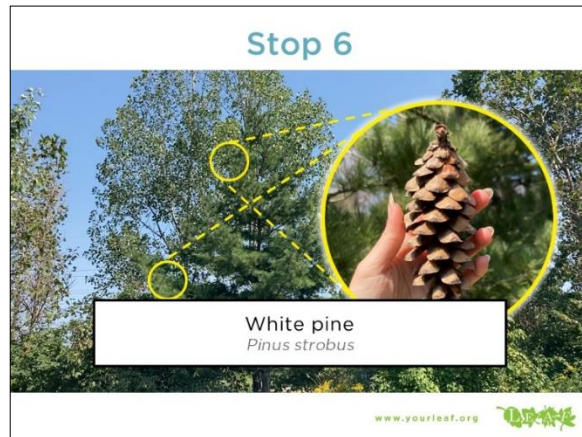

Virtual Education Activities

We hosted two virtual **volunteer orientations** since July 2022 with six Durham residents attending.

A **virtual tree tour** was delivered in Durham, based on Second Marsh. A self-guided activity sheet was created to accompany the virtual tree tour, inviting registrants to visit the parks in person or take a stroll in their own communities and identify the species covered during the event.

© 2022 LEAF – Self-guided activity sheet for the Second Marsh Virtual Tree Tour

© 2022 LEAF – A slide from the Discover Second Marsh Virtual Tree Tour, led by Lam Tran, the Education Coordinator at LEAF

Free Native Shrubs

150 native shrubs were distributed to 20 Durham Region residents by LEAF staff in October 2022. The opportunity was promoted to event attendees and to existing volunteers in our network. Residents were able to select from twelve different species and submit their request through our online Square Store.

BYTP Participant Testimonials

Participant Comments - Ajax

Please note that we did not receive any new responses from Ajax participants this fall.

Participant Comments – Brock

"The virtual meeting to discuss tree options was very helpful. I was a little overwhelmed by all the options that were suitable, but the personalized advice and discussion helped narrow the options down. I really appreciated all the trees offered are native."

Participant Comments – Clarington

"WONDERFUL service! Greatly appreciated the advice re appropriate trees for my yard, the soil, etc. Professional, knowledgeable, friendly staff. Even cleaned/tidied the site afterwards. I would never have been able to transport and plant a tree by myself, so that was a HUGE draw to the LEAF program for me. Wanted you to know how much I appreciated the service, but I'm not comfortable providing a public website testimonial."

Participant Comments – Oshawa

"The LEAF program was a fantastic program, it showed us to plant two trees in our yard that we might not have been able to afford so soon. The staff are super friendly and extremely knowledgeable. I've already recommended the program to others."

Participant Comments – Pickering

"I was delighted to find this program. It was a wonderful experience with expert and pleasant staff support and consultation. We are thrilled with our beautiful tree which was a reasonable price and a native species. The environmental factor played significantly into our deciding to buy a tree. The whole process was outstanding from initial contact to planting and we recommend this service wholeheartedly!"

Participant Comments - Scugog

Please note that we did not receive any new responses from Scugog participants this fall.

Participant Comments – Whitby

"She has arrived! Our White Spruce sits among large, mature deciduous trees, and will be our only large evergreen at our home in Whitby, Ontario. We are so excited to see her growth and splendor, many years to come. Thank you to the LEAF program, and LEAF family members for this opportunity which afforded us not only a native tree, but an opportunity for me to volunteer in this year's planting events in Whitby and Oshawa."

"From the website, email campaigns, initial in-person consultation, ordering process, status emails, delivery of my tree & shrub, planting tips, and after-care, your organization has exceeded my expectations. I am happy to have found it and look forward to volunteering and purchasing plant kits."
