Making Impactful Changes to Diversity and Inclusion Initiatives using Behavioural Science (AJBOT)

Date and Time: Wednesday, July 8 2:00 pm - 3:00 pm

Address: Webinar

The Ajax-Pickering Board of Trade is proud to introduce BEworks, the world's leading behavioural science firm dedicated to the application of evidence-based solutions to change society and the economy for the better. Behavioural science is the systematic study of the biases and mental short-cuts that explain human behavior and how best to overcome these biases using well-studied, scientifically-tested interventions.

In this session, BEworks will share the research, evidence, and solutions on how to improve diversity and inclusion outcomes for businesses and government leaders motivated to make lasting change. In particular, the research will focus on hiring and promotion efforts within small to large organizations. It is often the case that well-meaning solutions are proposed, but they are only temporary fixes, can make no difference to outcomes, or worse, backfire entirely.

HR Workshop: Maximizing Leadership Potential

Date and Time: Thursday, July 23 9:00 am - 10:00 am

Address: Webinar

Great leaders are not merely born with the extraordinary ability to give feedback and inspire people. One of the most critical decisions businesses often have to make is who to put in a leadership role — from frontline supervisors and all the way up the chain of command.

This single decision can have significant impact on employee engagement and overall productivity of your business.

ness. Technical skills or seniority should never be the sole determinant when deciding who should be a leader of the people within your organization. Those put into roles that manage people must first have the will to become a better leader and have the drive to take the steps needed to grow this skillset.

Whitby Chamber of Commerce: mMornings

Date and Time: Tuesday, July 28 9:00 am - 10:30 am

Address: Webinar

Interested in making connections and learning something new? Join us monthly for our mMornings series, which provides our members with the opportunity to share their expertise with you. This month's topic is cyber security for small businesses, presented by Gavin Steiner from Durham IT Services.

Does your business have a plan for cyberattacks? Cyberattacks on big companies dominate the news, but small businesses are big targets too. One in five small businesses fall victim to a cyberattack and of those, 60 per cent go out of business in six months. Data shows that most small business owners don't have a plan for response if they're hit.

That's a problem, because cyberattacks can range from the mildly annoying to the deeply destructive. Even the smallest can be costly and time consuming. From phishing scams to data breaches, the average attack costs a business \$9,000, says the National Small Business Association.

What you'll learn:

- Why saying "that happens to other businesses - it won't happen to us" can put you out of business
- How you as a business owner can be confident you're fully protected and secure

Who should attend:

- Members and non-members interested in networking and learning in a fun and supportive environment
- Individuals interested in protecting their business against cyber threats
